

NO REFUND POLICY

POLICY OVERVIEW

Effective Date: Purchase Date

Company: Aion flux Labs

1. ALL SALES ARE FINAL

- **Digital Nature of Products:** Due to the immediate, digital nature of the products sold by Aion flux Labs (including but not limited to digital courses, downloadable files, and license agreements), all sales are final.
- **Immediate Access:** Upon purchase, the customer is granted immediate access to the proprietary content. Because this content cannot be "returned" in the physical sense, Aion flux Labs does not offer a cooling-off period, trial period, or refund capability.
- **No Exceptions:** This policy applies to all products and services unless otherwise explicitly stated in writing by Aion flux Labs.

2. NO REFUNDS FOR "CHANGE OF MIND"

- **Customer Responsibility:** It is the customer's responsibility to review all product descriptions, course modules, and system requirements before completing a purchase. Aion flux Labs will not issue refunds for:
- Change of mind or lack of time to complete the course.
- Failure to read the product description or features.
- Incompatibility with customer's specific hardware or software (unless the error is on our end).

3. RESULTS DISCLAIMER & REFUND INELIGIBILITY

- **Results Not Guaranteed:** As stated in our Terms of Service, Aion flux Labs does not guarantee specific financial results, investment returns, or business outcomes.
- **Performance-Based Refunds:** A lack of financial success or failure to achieve a specific result after taking the course does not constitute a "defect" in the product and does not qualify the customer for a refund.

4. CHARGEBACKS & DISPUTE ABUSE

- **Unauthorized Chargebacks:** Any customer who initiates a credit card chargeback or dispute for a valid purchase will be permanently banned from accessing Aion flux Labs products and future services.
- **Dispute Resolution:** If you have a technical issue accessing your files, you must contact our support team at [Insert Email Address] before contacting your bank. We are committed to resolving technical access issues promptly.
